

LONG ISLAND CHAPTER – ASHRAE

FOREWORD

The 2024 Product Directory of Manufacturers and their Representatives in the Greater New York / Long Island area has been prepared by the Long Island Chapter of ASHRAE as a service to all its members and as a service to the local HVAC industry.

The Directory is intended to provide better communications between manufacturers and their sales representatives, engineers who specify products; contractors who purchase and install the equipment; and other interested parties. Product Directory listings are not limited to ASHRAE members, and the listings are not to be considered as advertising or endorsement by ASHRAE of any product, manufacturer, or representative.

Since the Directory is useful when the data it contains is current in all respects, the Chapter reissues an updated version on an annual basis.

Michael Nigro – President
ASHRAE – Long Island Chapter

Suggestions on ways of improving the Directory or notifications of errors in this edition are sincerely invited.

BELIMO Aircontrols Inc.
Innovations in Comfort,
Energy Efficiency, and
Safety Solutions

Belimo is a global leader in developing, producing, and marketing damper actuators, control valves, sensors, meters, and gas monitors for heating, ventilation, and air-conditioning (HVAC) systems.

Belimo offers superior reliability, easy installation, and seamless integration with major Building Automation Systems (BAS). We continue to focus on providing exceptional product availability, fast delivery times, and world class customer service and technical support.

Delta Cooling Towers are made from a corrosion proof engineered plastic. The cooling tower shell will never rust, flake, chip, peel or ever need painting or protective coatings applied. Delta believes its towers are the future of the industry. Metal towers do not have the long-term corrosion protection advantages for outdoor usage. The galvanizing or other metal treatments only delay the corrosion of the underlying, often thin gauge sheet metal. Delta stands behind its products with the best warranty in the industry. Delta provides a 20 Year Warranty on the cooling towers structural shell. In addition, Delta's cooling tower motors have a 5 year warranty.
