President's Message

Last months meeting with ACCA was well attended and I found Victor Goldschmidt to be a very interactive and dynamic speaker. His presentation "Air Conditioning – a look into the past and glimpse into the future" was interesting and thought provoking. I want to thank John Nally and Carolyn Cammalleri for arranging Victor Goldschmidt's visit. Victor was in town for three days and it took a lot of planning on John and Carolyn behalf to coordinate everything.

While Victor was in town he also presented to a group of Hofstra undergraduate engineering students. While we were at Hofstra we also meet with Dr. M. David Burghardt, the chairman of Hofstra Engineering Department. I spoke to Dr. Burghardt at length about exploring our industry interest in having engineering students participate in an engineering co-op program. This is a great way to get young engineers involved with our industry and to possible hire a talented engineer after they graduate. If any of our members are interested in having a co-op engineering student work at their firm please contact Steve Friedman or I and we discuss the details of the program.

During the month of February our chapter sponsored a table at the Annual Engineers Joint Committee of Long Island Awards Dinner which is held to observe National Engineers Week. The Chapter was well presented with over 10 members attending the event. The Keynote Speaker was Burton Dicht Managing Director, American Society of Mechanical Engineers. His topic was - "The Top 20 Engineering Achievements in the 20th Century". For your curiosity air conditioning & refrigeration was ranked as the number 10 achievement and the number one achievement was electrification.

I glad to report that ASHRAE National is placing a greater focus on reaching out to the general public. We want to make people more aware of the fact that ASHRAE helps sustain the world we live in. To help with this goal ASHRAE has produced a brochure for consumers, titled "Energy Tips for the Heating Season" I have 100 copies of this brochure if you are involved with residential clients or would like distribute this information at a local event please contact me.

Please don't forget about the annual golf outing, this event is scheduled for May 8th and fills up quickly. If you have any questions about this event please see the flyer that is included in the newsletter.

President Message Cont'd.

This month's presentation Micro Turbine for power and heat generation has been approved for 1 PDH credit. The presentation should be interesting and timely with the every increasing price for energy and the aging of the electrical grid in our area, I believe you will see more of these systems being utilized in the future and it is always good to be familiar with emerging technologies.

I look forward to seeing everyone at our March Meeting.

Research Promotion

This month, we're listing all the individuals and firms who contributed financially to ASHRAE Research this year. Last month I sent a letter asking for your financial donation. Please take a moment of your time and write a check. Remember, none of the research that ASHRAE funds is possible without your generous tax deductible donations, so please contribute to an industry that supports your profession.

History

Clyde M. Alston, Past Chapter President- 1958

While digging through the history archives I came across an old interview (attributed to Mr. Ralph Butler, P.E. (probably) dating back to 1994) and separate bio of the late Mr. Clyde M. Alston, P.E. Clyde was the Long Island Chapters second president. As one of the chapter's founding fathers I found his life, history and contributions to the chapter to be quite interesting and worth sharing with the chapter. Based upon the chapter's records Clyde was an active chapter member until his retirement in 1993. Clyde M. Alston passed away in 1996.

-Clyde M. Alston, P.E. has been a member of ASHRAE and its predecessor society ASHVE- since 1952. He served the society as the second Long Island Chapter President in 1959 and he has been a regular attendee and supporter of the Long Island Chapter for all the intervening years.

A graduate of the Carnegie Institute of Technology, Mr. Alston studied advanced Engineering at Polytechnic Institute of Brooklyn. During his professional career, he has served in various capacities as a Construction Engineer, Project Manager, member of the firm V.P. Victor and Edwin T Metcalf and as a partner in the firm of Bogen & Alston, Consulting Engineers. During World War II, Mr. Alston was a Captain in the Corps of Engineers. At this time he was a Project Manager for the utility services at the Headquarters Camp of the Persian Gulf Command in Tehran, Iran and Engineer-In-Charge of the aforementioned work during the American occupation of Japan.

In 1952, Mr. Alston became a partner in the firm of Bogen and Alston. The firm served as consultants on numerous commercial, industrial and public buildings. Mr. Alston began his own practice in 1958 under the name of Clyde M. Alston Consulting Engineer, and since then has been responsible for the mechanical engineering on a wide range of building types including banks, recreation facilities, industrial plants, churches and special projects as sewage plants, golf courses and atomic energy facilities

In addition to his certification of Qualification by the National Council of State Boards of Engineering Examiners, he is a licensed Professional Engineer in the states of New York, New Jersey, Pennsylvania, Connecticut, Virginia, Massachusetts, and Ohio. Mr. Alston's professional Affiliations include membership in the National Society of Professional Engineers, the American Society of Mechanical Engineers, American Society of Sanitary Engineers, Construction Specifications Institute, Long Island Building Congress, New York State Association of the Professions, American Arbitration Association, and the Consulting Engineers Council. He has also been a Director and Past President of the Nassau Chapter, NY State society of Professional Engineers, Past President of the Long Island Chapter of the American Society of Heating, Ventilation and Air Conditioning Engineers and Past President of the Long Island Chapter of the NY State Association of Consulting Engineers, and Past President of the Consulting Engineers Council of New York State.

Mr. Alston is also concerned with both civic and community affairs and has served as past President of the Kiwanis Club of New Hyde Park and was formerly the Village Engineer and a member of the School Board of that town. He was also past president of the New York Clan of Carnegie Tech Alumni and serves as a Carnegie Tech Alumni Advisor. Mr. Alston is also a member of the Hempstead Rotary Club.

Clyde M. Alston was a dedicated engineering professional and definitely not a "desk top" engineer. From a construction worker on Pittsburgh PA job sites to Engineer-In-Charge of rehabilitation of utilities for the Tokyo District during the occupation of Japan, Mr. Alston has displayed the rare qualities of a talented professional who is equally at home in the mud of a construction site. His contributions to the chapter and the engineering community in general still resonate to this day.

Thank you Mr. Alston.

And that is another piece of the Long Island Chapter's History.
